

MOTO GUZZI STELVIO DUECENTO TRIBUTO

THE ADVENTURE OF THE EAGLE PAYS HOMAGE TO THE FAMOUS ALPINE PASS THAT GIVES IT ITS NAME. OPENED IN 1825, UNIVERSAL SYMBOL OF ADVENTUROUS TOURISM AND INDISPENSABLE DESTINATION FOR EVERY MOTORCYCLING ENTHUSIAST

IN A LIMITED AND NUMBERED EDITION OF JUST 2,758 IN HONOUR OF THE HEIGHT OF THE PASS, STELVIO DUECENTO TRIBUTO STANDS OUT FOR ITS UNIQUE COLOURS AND ITS COMPLETE RANGE OF ACCESSORIES FITTED AS STANDARD

It was 1825 when the **Stelvio Pass** was opened to traffic: **200 years of history** for an imposing project that quickly became more than just a simple communication route. The famous pass linking Valtellina and Val Venosta, with a total of **88 hairpin bends** - 48 on the Alto Adige side and 40 on the Lombardy side - is now, more than anything, **a legendary destination for any motorcycling tourist**. A home for the soul and an unmissable conquest for every fan of the two wheels.

To celebrate this important anniversary, EICMA 2024 is the occasion for Moto Guzzi to unveil the **Stelvio Duecento Tributo**: a special version - a limited and numbered edition - of the latest adventure of the Eagle, designed for borderless journeys and bearing the prestigious name of the famous pass.

Produced with Stelvio PFF Rider Assistance Solution, the Duecento Tributo version stands out for its brand new **dedicated colours** that emphasise this particular model's disposition for adventure. Livery inspired by natural elements such as the white of the snow, combined with graphics in blue and red – very popular colours for the technical clothing designed for mountain excursions. Graphics enriched by unique details like the pattern that traces the form of the mythical hairpin bends and the **geographical coordinates** of the Stelvio Pass. Another element that visually conveys the spirit of the unflagging traveller is the **radiator protection grille**, where the stylised “signature” of the eagle shines out.

Stelvio Duecento Tributo is produced in a **limited and numbered edition of 2,758**, exactly the elevation (2,758 metres above sea level) that makes the Stelvio the highest paved pass in Italy. The number of each bike is shown on the handlebar riser.

The accessories of the Stelvio Duecento Tributo are designed with every type of journey in mind. Sharing the technical base of the Stelvio PFF Rider Assistance Solution, this model boasts the innovative driving assistance platform based on **Imaging Radar 4D** technology and **developed by Piaggio Fast Forward**. These devices play a vital role in terms of active safety,

guaranteeing the **Forward Collision Warning (FCW)**, **Blind Spot Information System (BLIS)** and **Lane Change Assist (LCA)** functions.

The outfitting includes **heated hand grips**, **heated comfort rider's and passenger seats**, a **central stand**, the **TPMS tyre pressure sensor**, the **bi-directional Quick Shifter** and the **Moto Guzzi MIA** multimedia platform.
