primary by gears,
secondary by cardan shaft
- Tires**
4.00 x 18
- Brakes**
4 shoes front brake single L.S.
rear brake pedal operated
from the right
- Weight**
240 kgs (528 lbs)

P.S. Windshield and pannier bags are supplied as optional.

This new version derives its name from its basic similarity to the Moto Guzzi Police Special which has proven its suitability in Police use in the West Coast, as well as other areas of the United States.

With the same engine, drive shaft, frame and general overall appearance of the V 850 GT, the California utilizes equipment such as a Special, Police-type handlebar, folding footboards, a large deeply-padded seat with handrails, front and rear crashbars, Police-type instrument panel and special extra-strength sidestand.

As with the V 850 GT and Police special models, the California offers smooth, high-speed performance as well as the maneuver-ability necessary for effective law enforcement use.
