N.B. Per i particolari non menzionati resta valido quanto indicato sui relativi cataloghi ricambi.

N.B. For the unmentioned items is valid as shown on the spare parts catalogues.

ISTRUZIONI PER L'USO

Per regolare il precarico delle molle agire sul dado "A", usando una chiave di 32 mm. Ruotando in senso orario si riduce il precarico della molla; ruotando in senso antiorario, viceversa, si aumenta il precarico.

Per regolare la frenatura idraulica dell'ammortizzatore, ruotare il pomello "B". Ruotando in senso orario si riduce la frenatura idraulica; viceversa, ruotando in senso antiorario, si aumenta la frenatura.

N.B. E' importante che il precarico delle molle e la frenatura degli ammortizzatori siano regolate in maniera uniforme su entrambi gli steli forcella, (entrambi i dadi di regolazione precarico dovranno essere ruotati del medesimo valore, partendo dalle posizioni di fine corsa, e così pure i due pomelli di regolazione frenatura idraulica).

INSTRUCTIONS

To adjust springs pre-loading, turn nut "A" through a 32 mm wrench. Turning it clockwise the spring pre-loading is reduced; turning it counterclockwise, the pre-loading increases.

To adjust the damper hydraulic operation turn knob "B".

Turning it clockwise, the hydraulic operation decreases; turning it counterclockwise, it increases.

N.B. It is important that spring pre-loading and damper operation are equally adjusted on both forks prongs, (equally turn both pre-loading adjustment nuts, beginning from end of stroke position, as well as the two hydraulic operation adjustment knobs).
